Summer Internship & Co-op/Part-Time

Positions Available, Interviewing Now

Rhino FPE is a rapidly growing fire-protection consulting firm based in Northern Virginia. Since fire protection is our specialty, we provide a level of mentorship that isn't always found in multi-disciplinary firms.

We believe in providing you with a broad experience that covers many facets of fire protection engineering – sprinkler & fire alarm design, code consulting, facility assessments, and construction administration, to name just a few. If we have a project that interests you, chances are you'll be working on it.

Our interns have designed fire alarm systems, witnessed high-speed explosion suppression tests, and travelled across the country. The one thing they haven't done is the same old thing every day.

We're looking for motivated individuals who are willing to learn, ask questions, and push their boundaries.

We're looking for interns to support our operations, but also because we believe in starting students out on the right track; not only do we offer competitive pay, but we also offer a 401(k) plan, even for our interns.

Call us today and see how Rhino FPE can help you learn and grow as an engineer.

Please send resumes to:

John Mitros

jmitros@rhinofpe.com
