

Message about Post-Doc opportunity from Prof. McGill @ PSU:

I was recently awarded a grant to support a post-doctoral researcher in the area of post-blast forensic analysis. The grant is for two-years with an option for three, to begin late June 2009 or soon thereafter. The post-doc will be situated within the College of Information Sciences and Technology at the Pennsylvania State University in State College, PA.

I am interested in newly-minted PhDs from the reliability, mechanical, civil or aerospace engineering programs at UMCP with an interest in blast effects analysis, forensic engineering and information technologies. The PhD MUST be in hand prior to the start of the post-doc. The interested candidate MUST be a US Citizen.

Please forward this announcement to your graduate students and faculty.

If there are any questions, all interested parties may contact me at wmcgill@ist.psu.edu or (814) 867-0270. I would appreciate resumes from those that are eligible to pursue this opportunity.

William L. McGill, PhD, PE, CRE
Assistant Professor of Security Risk Analysis
(and UMCP ENAE MS 2003, ENRE PhD 2008)
The Pennsylvania State University
101P IST Building, University Park, PA 16802
