JOIN US

Inspired. Committed. Connected.

These are the qualities of our work—and of the people who do it. If these qualities are part of your life, too, you'll want to explore a career at EKFox.

As part of our creative, can-do team, you'll have the chance to realize your full potential through a wide range of challenging engineering assignments. You can take pride in helping us to design for future generations, working to enrich America's security—at home and abroad—and spearheading exciting new directions in sustainability and energy efficiency.

EKFox is an experienced team of talented, motivated individuals who share a passion for solving problems and improving the built environment. We continue to strengthen our commitment to provide a work environment and culture that stimulates creativity, values integrity and encourages professional growth.

We are looking for a Fire Protection Engineer and a Fire Protection Intern to join our future:

If you believe you are exceptional, there is a natural attraction to EKFox because:

- You are one of the most productive people you know
- You look for opportunities to further our clients' satisfaction and make them raving fans of our work
- You think holistically about the engineering problem at hand and like to apply “what-if” scenarios
- You understand and embrace the real meaning of being a team player
- You are committed to getting a job done right the first time
- You seek to understand then to be understood
- A work-life balance is important to you
- You want to work for a company that respects you first and challenges you second
- You've earned competitive pay, 100% employer-paid medical benefits, time off, and 401(k)

Once on board, you will:

- Have a thorough orientation to all aspects of the company
- Have an opportunity to do what you do best everyday
- Get exposed to some of the most challenging design efforts, locally and globally
- Have access to the latest technology in the industry
- Have a life outside the office

To be successful here, you will:

- Have a BS in FPE, AE, or ME with 2-5 years experience (Interns on track for graduation)
- Be open-minded yet tough-minded
- Value ideas but relish in results
- Feel that problem-solving comes second-nature to you
- Take ownership of design, specifications and drawing review of automatic sprinkler, carbon dioxide and clean agent suppression systems. (Interns: be ready to learn!)
- Have working knowledge of NFPA regulations, hydraulic calculations, pump sizing and systems applications
- Have AutoCAD come so naturally you can do it in your sleep

Please send resume and cover letter to HR@ekfox.com. We are located at 4035 Ridge Top Road in Fairfax, VA 22030.
