AECOM is actively seeking a highly motivated Fire Safety Engineer for employment in the Tampa, FL office. AECOM is searching for candidates that have the ability to be a role model, be client-focused, be impactful and be decisive. In this role, entry-level technical new hires are eligible to participate in AECOM’s Graduate Development Program (GDP), a 2-year development experience designed to support assimilation into the organization, help with technical development planning toward licensure (or other early technical milestones), and with creating a foundation of knowledge necessary for future career success.

Imagine working on rewarding projects within a diverse culture, and having access to exceptional training and career development opportunities. Working at AECOM means being part of a global team, working with award-winning professionals across the world. Aspire to be a key player on some of the best projects regionally, with opportunities to work on projects nationally or internationally. Our people bring deep industry knowledge to help you succeed.

The selected applicant will work with a team of experienced fire protection engineers in the areas of fire protection system design and life safety analysis. This applicant will learn from these experienced staff members and will be allowed to grow within their chosen professional field by being exposed to other design professionals throughout AECOM and our impressive list of professional clients.

The work we do is vital to our entire design team as we advise our design teams on fire/life safety issues as they relate to the entire projects.

**Minimum Requirements**

- Bachelor’s Degree in Mechanical Engineering or Fire Safety
- Interested in Fire Protection Engineering
- Excellent interpersonal and communication skills
- Team attitude
- Valid driver's license

**Preferred Qualifications**

- EIT
